

How It Works:

The first session with all participants will be booked with our physiotherapist, so they can recommend and complete a support plan based on the participant's goals.

Participants can book in online by using this link: <https://xrhealth.com.au/ndis-appointment/>

The suitability for the virtual reality headset will be assessed by the clinician and they will devise an appropriate treatment plan.

The initial appointment and first VR session both run for 1 hr and are billed at \$150.00 each. The weekly subscription below is then required.

The XR Health Social Participation Bundle Includes:

Individual designed plan | Ongoing clinician contact | Regular plan review

- Ongoing review of your Individually designed therapeutic plan based on your NDIS and health goals.
- Regular contact by the clinician.
- Plans are modified as required in consultation between you and the XRHealth clinician.
- You can talk with the clinician at any time via CliniChat.
- In preparation for your NDIS Planning meeting XRHealth can compile a comprehensive report highlighting the clinical recommendations with this data. This can guide future funding applications.
- Access to your results and progress reports during your VR sessions via the XRHealth mobile app. This is also regularly reviewed by the clinician.

Hardware and technology access and support

- Ongoing rental of the XR headset.
- Access to all VR applications and ongoing up-grades.
- You will be provided with ongoing technical support and trouble shooting.

Group sessions and ability to be a part of a wider XRHealth community

- Access to XRHealth virtual Connect (group) sessions and group activities run by our clinicians.
- You are part of a supportive XRHealth community which includes other allied health teams and networks.

Current offer

- No Lock in contracts, you can cancel anytime with 48 hours notice.
- Once the headsets have been returned - no more to pay.
